PROFILE

Motivated Artificial Intelligence undergraduate with hands-on experience in **Python development**, **C# .NET software engineering**, and **machine learning**. Strong interest in **Data Engineering**, including ETL pipelines, data processing, and scalable data systems. Passionate about building efficient solutions and continuously learning modern technologies.

EXPERIENCE

Junior Software Engineer (C# .NET)

Iot Systems Private Limited – Karachi
Duration: 2 Months

- Worked on C# .NET applications as part of the development team.
- Assisted in writing clean, maintainable, and testable code.
- Worked on debugging, UI fixes, and backend logic implementation.
- Collaborated with senior developers to understand software requirements and deliver modules on time.

EDUCATION

Bachelor's in Artificial Intelligence

Iqra University

Intermediate

Johar Degree Science and Commerce

Matriculation

St Peter's High School

TECHNICAL SKILLS

Programming: Python, C#, SQL
Frameworks/Tools: .NET Framework, .NET Core, NumPy, Pandas, TensorFlow/Keras, Scikit-learn
Concepts: OOP, Machine Learning, Deep Learning, Data Cleaning, ETL Pipelines
Other: Git/GitHub, Jupyter Notebook, REST APIs, Web Scraping

PROJECTS

STOCK PRICE PREDICTION

- Scrap the data from yahoo finance and store it into csv file
- Take the 5 years of google stock data and train the deep learning modal LSTM make prediction from it and get 75% accuracy

CREDIT CARD FRUAD DETECTION

- Get the data from the Kaggle and data is already preprocessed with the help of PCA
- Deep learning modal I have used in this is CNN for training and get the 98% accuracy

HOUSE PRICE PREDICTION

- Get the data from Kaggle and preprocessed it and for this I have used Linear regression for prediction

CERTIFICATES

BOOTCAMP OF DEVOPS *(80 hours)*

Held at Iqra university
